IT Management and Security for Accounting Firms

Supporting the Tech Needs of the Modern Accounting Firm

You've got a vision for your business that doesn't include tech frustrations, unplanned downtime, and data breaches. We're here to help you achieve that vision.

Our team delivers high-impact IT services and security solutions for accounting firms.

It doesn't matter whether your systems are all on-site, in the cloud, or in a hybrid setup—we can help you get the most out of your IT investment while protecting your clients' confidential data.

Enterprise-Grade Security to Protect Your Reputation and Your Data

A data breach can cause irreversible harm to your brand. Our team delivers continuous, proactive, monitored cybersecurity protocols to help you avoid the pain of unauthorized data access by criminals.

- ► 24/7/365 cybersecurity monitoring
- ► Cybersecurity incident response
- ► Patching and security updates
- ► Endpoint security
- ► Mobile device security
- ► Email security
- ► Secure data backups
- ► Enterprise-class antivirus and firewall management

Technology Support Designed for the Cutting-Edge Accounting Firm

- ► **24x7 Advanced Performance Monitoring**—Caring for the health, security, and functionality of your critical network and cloud assets

- ► **Cloud/Mobile Consulting, Security, and Management**—Providing a protected environment for your workflow both in and out of the office
- ► **Scheduled Preventative Maintenance**—Keeping your servers, PCs, and other vital network devices functioning optimally—improving reliability and security
- ► **Backup Management**—Harnessing industry best practices to keep your environment and essential business data secure, protected, and available
- ► **Workflow Optimization**—Optimizing your network by identifying, reporting, and resolving issues in real-time
- ► **Remote Support for Your Team**—Giving you and your staff access to our technicians for IT answers and timely troubleshooting

Digital Transformation Consulting, Strategy, and Implementation

There are many things in business that are beyond your control, but the security of your web traffic doesn't have to be one of those things. By partnering with our team, you gain the ability to determine what websites your employees and network visitors can access, dramatically improving your overall cybersecurity posture.

Dependability and Fewer Surprises

Your clients trust you with their business accounting, personal financials, tax filings, and so much more. You are their dependable resource for all their accounting needs. Our team aims to provide the same level of professionalism and dependability for you when it comes to your IT systems. Whether you run into an IT question, need some troubleshooting, or require assistance with something more serious, we're here to help.

The Benefits of a Comprehensive, Proactive Approach to Your IT Support

- ▶ A consistent, monthly IT support expense
- ▶ A single point of contact for all your technology needs
- ▶ A technology support solution that can scale with you
- ▶ Answers and support for your employees' day-to-day IT questions
- ▶ Confidence in your cybersecurity management, monitoring, and posture
- ▶ Consulting to deliver mobile and innovative IT options
- ▶ Mitigation of unplanned downtime risk
- ▶ Proactive IT maintenance to keep your operations up and running
